

Prabhakara (Prabha) Nagareddy, M. Pharm, M.Sc., PhD, FAHA

Professor, Section of Cardiovascular Diseases, Dept. of Internal Medicine

The University of Oklahoma Health Sciences Center (OUHSC)

Oklahoma City

Email: Prabhakara-Nagareddy@ouhsc.edu

EDUCATION:

- B. Pharm. Pharmacy (*Distinction*), Bangalore University, Bangalore, India, **1993-1997**.
- M. Pharm. Pharmacology (*Distinction*), Rajiv Gandhi University of Health Sciences, Bangalore, India, **1999- 2001**.
- M.Sc. Pharmaceutical Sciences (Pharmacology), University of British Columbia (UBC), Vancouver, Canada, **2002- 2004**.
- Ph.D. Pharmaceutical Sciences (Pharmacology), University of British Columbia (UBC), Vancouver, Canada, **2005- 2009**.

TRAINING:

- Post-Doctoral Preventive Medicine and Nutrition, Department of Internal Medicine, Columbia University, New York, **2009-2013** (Dr. Ira Goldberg, Mentor)
- Post-Doctoral Division of Cardiovascular Medicine, Department of Internal Medicine, University of Kentucky, Lexington, **2013- 2016** (Dr. Susan Smyth, Mentor)

ACADEMIC APPOINTMENTS:

- 05/2016-06/2019 Assistant Professor
Department of Pathology, School of Medicine
University of Alabama at Birmingham (UAB)
- 07/2109- 07/2023 Associate Professor (Tenured)
Division of Cardiac Surgery, Dept. of Surgery
Ohio State University, Columbus
- 08/2023-Current Professor
Section of Cardiovascular Diseases, Dept. of Internal Medicine
The University of Oklahoma, Health Sciences Center, Oklahoma City
- 11/2023- Current Adjunct Professor
Department of Pathology
The University of Oklahoma, Health Sciences Center, Oklahoma City
- 01/2024- Current Adjunct Professor
Department of Biochemistry and Physiology
The University of Oklahoma, Health Sciences Center, Oklahoma City

- 05/2024- Current Adjunct Professor
 Department of Pharmaceutical Sciences
 OU College of Pharmacy, Oklahoma City
- 08/2024- Current Extraordinary Professor
 Division of Medical Physiology, Department of Biomedical Sciences
 Faculty of Medicine and Health Sciences,
 Stellenbosch University, South Africa

MAJOR RESEARCH INTERESTS:

The research in my lab is broadly focused on understanding the pathological basis for enhanced atherothrombotic risk in cardiometabolic disease. In this regard, we have been studying the role of NLRP3 inflammasome signaling in myeloid cells particularly, neutrophils and macrophages. We have identified certain neutrophil-derived alarmin molecules (i.e., S100A8/A9) that activate the NLRP3 inflammasome and, facilitate the release of pro-inflammatory cytokines. These cytokines travel to the bone marrow, interact with different hematopoietic stem and progenitor cells (HSPCs) in the bone marrow (BM) to stimulate aberrant myelopoiesis and thrombopoiesis, thus increasing the risk of atherothrombosis. Thus, our focus is mainly on identifying the inflammatory cues/signaling mediators that interact with HSPCs in the BM to promote systemic inflammation. Our short-term goal is to validate and repurpose certain FDA-approved agents to target acute and chronic inflammation to improve cardiometabolic outcomes. The long-term goal is to harness the wealth of knowledge from our studies and others to develop novel therapeutic strategies to reduce the overall burden of cardiovascular and cardiometabolic diseases.

AWARDS/ HONORS:

- 2024 International Visiting Professorship Award, American Heart Association
- 2022 Chair, Recent Advances in Cardiovascular Disease Research and Therapeutics, 4th International Symposium, GTS-2022 (Virtual).
- 2022 Best Oral Communication Award, 15th World Congress on Inflammation, Rome, Italy
- 2022 Co-Chair, Lipids, Inflammation and Vasculature, 2nd Olympiad in Cardiovascular Medicine, Heraklion, Greece.
- 2021 Distinguished Reviewer for Diabetes Journal
- 2020 Elected, Fellow of the American Heart Association, BCVS (FAHA)
- 2018 Young Investigator Award (Finalist), International Society for Heart Research (ISHR), Halifax, Canada.
- 2017 Kenneth M. Brinkhous Young Investigator Prize in Thrombosis (Finalist), Arteriosclerosis Thrombosis and Vascular Biology (ATVB), American Heart Association (AHA), Minneapolis, MN
- 2015 Dean's Distinguished Lecture Award, College of Medicine, University of Kentucky
- 2015 Outstanding Post-Doctoral Presentation, Gill Heart Institute Cardiovascular Research Day, University of Kentucky, Lexington, KY
- 2015 Young Investigators Award, American College of Cardiology, Kentucky Chapter, Lexington, KY
- 2015 Outstanding Early Career Award (Finalist), AHA, Basic Cardiovascular Sciences Scientific Sessions, New Orleans, LA
- 2015 Irvine H. Page Young Investigator Research Award (Finalist), Arteriosclerosis Thrombosis and Vascular Biology (ATVB) Scientific Sessions, San Francisco, CA
- 2014 Stew Whitman Memorial Award, Cardiovascular Research Day, University of Kentucky, Lexington, KY
- 2014 Best Research Presentation, Barnstable Brown Obesity and Diabetes Research Day,

2014 University of Kentucky, Lexington, KY
 2014 The Canadian Institutes of Health Research (CIHR), Institute of Circulatory and Respiratory Health (ICRH) Travel Award, Canada
 2014 Best Poster Presentation, College of Medicine, University of Kentucky, Lexington
 2014 Stew Whitman Memorial Award, Cardiovascular Research Day, University of Kentucky, Lexington, KY
 2013 Vasculata Scholarship, North American Vascular Biology Organization, San Diego
 2013 Best Research Presentation, Barnstable Brown Obesity and Diabetes Research Day, University of Kentucky, Lexington, KY
 2012 Have a Heart Award, Canadian Cardiovascular Society, Canada
 2012 The Canadian Institutes of Health Research (CIHR), Institute of Circulatory and Respiratory Health (ICRH) Travel Award, Canada
 2012 Future of Science Fund Scholarship, Keystone Symposia, Big Sky, MT
 2011 Young Investigator Award, ATVB Council, Chicago, IL
 2010 Post-Doctoral Research Fellowship from CIHR (3 years), Canada
 2010 Early Career Investigator Award, The Kern Aspen Lipid Conference, Aspen, CO
 2008 Peter Dresel Award, The IXth World Conference on Clinical Pharmacology & Therapeutics, Canada
 2008 Graduate Student Travel Award, Canadian Society for Clinical Pharmacology, Canada
 2008 Graduate Student Travel Award, The American Society for Pharmacology and Experimental Therapeutics, San Diego, CA
 2007 Subhash C. Verma Prize in Pharmaceutical Sciences, University of British Columbia, Canada
 2006 Heart and Stroke Foundation Travel Award, Canada
 2006 Doctoral Research Award, Heart and Stroke Foundation of Canada, Canada
 2006 Doctoral Research Award, Canadian Diabetes Association, Canada
 2006 Doctoral Research Award, The Michael Smith Foundation for Health Research, Canada
 2005 Graduate Student Travel Award, The American Society for Pharmacology and Experimental Therapeutics, San Diego, CA
 2004 The John H McNeill Prize, University of British Columbia, Canada
 2004 Graduate Research Scholarship in Pharmacy, Health Research Foundation of CIHR and Rx&D, Canada
 2001 Sri Nagaraja Rao Memorial Prize, Rajiv Gandhi University of Health Sciences, Bangalore, India
 2001 Silver Jubilee Fund Prize, Rajiv Gandhi University of Health Sciences, Bangalore, India
 1999 Junior Research Fellowship, Government of India, India
 1993 National Merit Scholarship (6 years), Government of India, India

FUNDING:

[Current Support](#)

R01 HL137799-01A1

(PI: Nagareddy, PR)

04/01/2018-03/31/2025

NIH/NHLBI

Title: Thrombopoiesis in Diabetes: Role of Damage Associated Molecular Patterns

Aim: The main objective of this study is to understand the mechanisms of thrombopoiesis in diabetes and examine its contribution to the inefficacy of the standard antiplatelet drugs such as aspirin and clopidogrel and, atherothrombotic complications in diabetes.

R01 HL156856-01A1 (PI: Nagareddy, PR) 07/01/2022-06/30/2027
NIH/NHLBI

Title: A dialogue between neutrophils and monocytes for effective resolution of inflammation following acute myocardial injury.

Aim: The main objective of this grant is to study the role of neutrophil-derived S100A8/A9 proteins in resolving inflammation following acute myocardial injury.

AHA TPA (970002) (PI: Nagareddy, PR) 07/01/2022-06/30/2025

Title: Harnessing the potential of an endogenous anti-inflammatory mechanism to mitigate cardiac inflammation and heart failure

Aim: The main goal of this project is to understand how inflammation is suppressed in the BM post-MI by reverse migrating neutrophils via the engagement of IL-10-1L-10 R signaling.

24IVPHA1291489 (PI: Nagareddy, PR) 04/01/2024-03/31/2025
AHA

Title: Exploring the role of mitochondrial function in atherosclerotic plaque macrophages

Aim: This is AHA International Visiting Professorship Award. To main objective of this award is to support the visit of Prof. Andrew Murphy and his team from The Baker Heart and Diabetes Institute, Australia to Nagareddy lab.

[Pending Support](#)

R35 HL177235-01 (PI: Nagareddy, PR) 09/01/2024-08/31/2031
NIH/NHLBI

Title: Mechanism of aberrant hematopoiesis in cardiometabolic disease.

Aim: The main objective of this grant is to study the signaling pathways involved in aberrant hematopoiesis including thrombopoiesis and clonal hematopoiesis in Obesity/ diabetes

Status: Pending

R01 DK141795-01 (PI: Nagareddy, PR) 09/01/2024-08/31/2029
NIDDK

Title: Targeting Adipose Tissue Inflammation to Mitigate the Development of Type 2 Diabetes in Obesity

Aim: *The main objective of this grant is to study the role of inflammasome and Gasdermin D signaling in aggravating obesity-induced adipose tissue inflammation, insulin resistance, hepatic steatosis, and onset of type 2 diabetes.*

Status: Pending

R01 HL137799 (Renewal) (PI: Nagareddy, PR) 09/01/2024-08/31/2029
NIH/NHLBI

Title: Thrombopoietin Independent Mechanisms of Thrombopoiesis in Type II Diabetes

Aim: The main objective of this grant is to elucidate the molecular mechanisms that promote thrombopoiesis in type 2 diabetes and characterize the functional properties of reticulated platelets

Status: Pending

R01 HL177465-01 (PI: Nagareddy, PR) 09/01/2024-08/31/2029
NIH/NHLBI

Title: Clonal hematopoiesis (CHIP) in diabetes: implications for Cardiometabolic Diseases

Aim: The main objective of this grant is to examine the role of impaired AMPK signaling and its interaction with CHIP in aggravating cardiometabolic features in type 2 diabetes

Status: Pending

R21 AG091000-01 (PI: Nagareddy, PR) 09/01/2024-08/31/2026

Title: Impact of age and sex on myocardial infarction induced inflammatory response.

Aim: The main objective of this grant is to examine the role of age and sex on neutrophil dominated acute inflammatory response during myocardial infarction.

Status: Pending

SRA201311658 (PI: Nagareddy, PR) 09/01/2024-08/31/2027

Title: Targeting Neutrophil-Derived S100A8/A9 to Prevent/ Delay the Onset of T1D

Aim: The main objective of this grant is to examine the role of neutrophil derived S100A8/A9 in triggering islet cell pathology and development of type 1 diabetes.

Status: Pending

Completed Support

R21AG063197-01A1 (MPI grant, Contact PI: De Luca, M) 08/15/2020-05/31/2024.

NIH/ NIA

Title: Syndecan-4 as a molecular link between adipose tissue and aging

Aim: The main objective of this grant is to elucidate the role of syndecan4 in adipose tissue dysfunction and cellular senescence.

R00 HL122505 (PI: Nagareddy, PR) 07/01/2016-07/31/2020

NIH/NHLBI

K99 R00 Pathway to Independence Award

Title: Mechanisms of Monocytosis in Obesity: Implications for Cardiovascular Disease

Aim: The goal of this study is to elucidate the molecular mechanisms of enhanced monocytosis in obesity and study its overall impact on atherosclerosis lesion regression

Role: PI

1K99HL122505 (PI: Nagareddy, PR) 05/01/2014-04/31/2016

NIH/NHLBI

Title: Mechanisms of monocytosis in obesity: Implications for cardiovascular disease

Aim: The goal of this study was to elucidate the mechanisms of enhanced monocytosis in obesity.

Role: Postdoctoral Fellow

1000402363 (PI: Nagareddy, PR). 07/01/2013-06/30/2014

Canadian Diabetes Association (CDA)

Title: Role of S100A8/A9 in hyperglycemia-associated monocytosis in type II diabetes.

Aim: To examine if plasma levels of S100A8/A9 correlates with monocytosis and Hb1Ac/blood glucose in type II diabetic subjects and to study the mechanisms the regulate S100A8/A9 production/secretion in neutrophils

Role: Postdoctoral Fellow

BMS01012011 (PI: Goldberg, IJ) 01/01/2011-12/31/2012

Bristol-Myers Squibb Company

Title: Effects of glucose reduction on white blood cells, lipoproteins, and atherosclerosis

Aim: The main objective of this study was to study the effect of Dapagliflozin, an SGLT2 inhibitor on hyperglycemia-induced monocyte and atherosclerosis lesion regression in mouse models of type I diabetes.

Role: Co-Investigator

200910MFE-213293-142925 (PI: Nagareddy, PR). 04/01/2010-03/31/2013
Canadian Institutes of Health Research (CIHR), Canada

Title: Role of Aldose Reductase (AR) and Matrix Metalloproteinases (MMP) in the Development of Diabetic Atherosclerosis"

Aim: The main objective of this study was to investigate the role of aldose reductase and matrix metalloproteinases in promoting atherosclerosis in mouse models of type I diabetes.

Role: Postdoctoral Fellow

HSFC DRA (PI: Nagareddy, PR) 07/01/2006-06/30/2009
Heart and Stroke Foundation of Canada, Canada

Title: Mechanisms of vascular dysfunction in diabetes, role of nitrosative stress.

Aim: The main objective of this study was to examine the role of nitrosative stress in diabetes-induced vascular dysfunction with a particular emphasis on inducible nitric oxide synthase

Role: Predoctoral Fellow

MSFHR-SGS-BR (PI: Nagareddy, PR) 07/01/2006-06/30/2009
The Michael Smith Foundation for Health Research, Canada

Title: Mechanisms of vascular dysfunction in diabetes, role of iNos and PKC beta.

Aim: The main goal of this study was to investigate the molecular mechanisms of vascular dysfunction in diabetes and specifically study the role of PKC beta isoform and iNOS enzyme systems in promoting endothelial dysfunction, attenuated pressor responses to vasoactive agents and other hemodynamic abnormalities.

Role: Predoctoral Fellow

CAAA-142925 (PI: Nagareddy, PR) 07/01/2004-06/30/2006
The Health Research Foundation of CIHR and Rx&D, Canada

Title: Hemodynamic effects of inducible nitric oxide synthase in STZ diabetic rats

Aim: main objective of this study was to characterize the hemodynamic abnormalities in STZ diabetic rats and investigate the abnormal signaling pathways that led to these abnormalities with a specific focus on iNOS-derived nitric oxide.

Role: Predoctoral Fellow

MEMBERSHIPS:

2004- Pres.	American Heart Association
2010- Pres.	European Atherosclerosis Society
2018- Pres.	Society for Leukocyte Biology
2017-Pres.	International Society for Heart Research
2022- Pres.	American Physiological Society

GRANT REVIEW COMMITTEE/ STUDY SECTION:

2024	VICI-Programme, The Netherlands Organization for Scientific Research
2024	Special Emphasis Panel, K08 Training Grants, NIH
2023	Austrian Science Fund (FWF), Special Research Programme Review Committee (CDA, TPA), AHA
2022	Review Committee (CDA, TPA), AHA Israel National Foundation

2021	Review Committee (PPG), Special Emphasis Panel, NIH Review Committee (HTBT Study Section), NIH
2020	Review Committee (CDA, TPA Awards), AHA
2019	Review Committee (TPA Awards), AHA
2018	Review Committee (R15), Vascular and Hematology SEP, NIH
2018	Review Committee Member, US-Israel Binational Science Foundation
2017	Review Committee Member, Diabetes UK (United Kingdom)
2013-2015	CCTS TL1: Review Committee Member, Predoctoral Training Program, University of Kentucky
2013-2015	CCTS KL2: Review Committee Member, Junior Faculty Training Program, University of Kentucky.

JOURNAL REVIEW (Ad hoc):

JAMA, JACC, Circulation, Circulation Research, Journal of Clinical Investigation (JCI), Sciences Advances Ageing Cell, Journal of Biological Chemistry (JBC), Diabetes, Diabetologia, ATVB, Endocrinology, Cardiovascular Research, Atherosclerosis, Scientific Reports, Journal of Molecular and Cellular Cardiology (JMCC), Biochemical Pharmacology, Obesity, British Journal of Pharmacology, European Journal of Pharmacology, Journal of Ethnopharmacology, Molecular and Cellular Biochemistry, PLOS One, eBioMedicine, AJP Endocrinology and Metabolism, AJP Regulatory, Integrative and Comparative Physiology, Cellular and Molecular Life Sciences, Journal of Thrombosis and Hemostasis. AJP: Heart and Circulatory Physiology, Frontiers Journals, MDPI Journals etc.

EDITORIAL ACTIVITIES:

Board Member:

Diabetes (Official Journal of the American Diabetes Association)
Atherosclerosis (Official Journal of the European Atherosclerosis Society)
Scientific Reports (Nature Publications)
American Journal of Physiology: Heart and Circulatory Physiology (AJP)
Journal of Endocrinological Research (Official Journal of the Italian Society of Endocrinology)
Frontiers in Cardiovascular Medicine

Managing/ Associate Editor:

Pharmacological Research (An International Union of Basic and Clinical Pharmacology, IUPHAR affiliated journal)
Frontiers in Cardiovascular Medicine: Section on Cardiovascular Therapeutics

Frontiers in Cardiovascular Medicine: Clinical and Translational Cardiovascular Medicine
Nutrients, Topical Advisory Panel Member
Cells, Guest Editor, Special Issue, Cardiac and Skeletal Muscle Physiology and Diseases: Cellular Mechanism
Nutrients, Nutritional Epidemiology, Topic Advisory Panel

TEACHING:

1998-1999	Lecturer, Bangalore University, India
2001-2002	Lecturer, Bangalore University, India
2002-2004	Tutor, Problem Based Learning (PBL), UBC, Canada
2018-2019	BMS 612, Systems Pharmacology 1, Modules 9-11, UAB
2019-2023	PATHOL 7847, Cellular Mechanisms and Pathogenesis of Inflammation
2021-2023	PHAR3100, Human Physiology and Disease
2022- 2023	PHYSIO812, Advanced Cardiometabolic Disease

INDUSTRY:

2001-2002	Scientist, Diabetic Vascular Complications-Drug Discovery Group, Torrent Research Center, India
-----------	---

MENTORING:

As a graduate student at University of British Columbia

2005-2009	Mentor (2 students), Summer Student Research Program
-----------	--

As a post-doctoral fellow at Columbia University

2010-2011	Mentor (1 student), Master's Program, Institute of Human Nutrition
-----------	--

As Principal Investigator

Postdoctoral trainees/ Research Scientists

2024- Current	Mathankumar Marimuthu (Vellore Institute of Technology, Vellore, India)
2024- Current	Dipanjan Chattopadhyay (Visva Bharati University, India)
2024- Current	Krishna Maremanda (National Institute of Pharmaceutical Education and Research (NIPER), Punjab, India)
2023- Current	Rajnikant Shukla, PhD (King George's Medical University, India)
2022- Current	Babu Nageswararao Kanuri, PhD (CDRI Lucknow, India)
2020- Current	Albert Dahdah, PhD (INSERM, Paris, France)
2023- 2023	Sabita Pokhrel, PhD (University of Akron, Ohio, USA)
2022- 2023	Qiang Wang, PhD (University of Chinese Academy of Sciences, China)
2017- 2022	Gopalakrishna Sreejit, PhD (CDFD, Hyderabad, India)
2016- 2020	Baskaran Athmanathan, PhD (Bharathidasan University, India)
2018- 2019	Sunil Noothi, PhD, (Tata Institute of Fundamental Research, India)
2016- 2017	Ashish Dhyani, PhD (University of Milan, Italy)

Graduate Students

2016- 2021	Co-Mentor, Justin Gibson, Graduate Biomedical Science Program; Cellular, Molecular, and Developmental Biology (CMDDB) Theme, UAB
------------	--

Undergraduate Students:

2020- Current	Jacob Jobe, OSU
2020- 2022	Darren Webb, OSU
2020- 2021	Isaac Stokes, OSU
2020- 2021	Samuel Asamoah, Ohio Dominican University, Columbus
2014- 2016	Rahul Annabathula, University of Kentucky, MD

Dissertation Committee

2023-	Kaitlyn Hill, Department of Physiology, OUHSC
2024-	Anna Faakye, Biochemistry and Physiology, OUHSC/ OMRF
2024-	Weronika Zarzycka, Biochemistry and Molecular Biology, OUHSC

INVITED TALKS/ ORAL PRESENTATIONS:

2024	Neutrophils: The Protagonists of Inflammation in Cardiometabolic Disease” Lund University, Malmo Sweden.
2024	Navigating Academic Careers: India to the USA. Manipal University, Manipal, India.
2024	Beta Blockers in Acute Myocardial Infarction: Old Dog and New tricks? Department of Internal Medicine Grand Rounds, OUHSC, OK.
2023	Neutrophils in Cardiometabolic Disease, Department of Pathology, OUHSC.
2023	Neutrophil Kinetics During Myocardial Infarction, Department of Microbiology, and Immunology, OUHSC
2023	Neutrophils during Myocardial Infarction: The Good, The Bad and the Ugly: Harold Hamm Diabetes Center Seminar Series, OUHSC.
2023	Neutrophils During Myocardial Infarction: The Good, The Bad and The Ugly. Society for South Asian Heart Research (SAHR), Early Career Seminar Series.
2023	Beta Blockers in Heart Failure: Old Dog and New tricks? Department of Medicine, University of Padova, Padua, Italy.
2023	Neutrophils During Myocardial Infarction: The Good, The Bad and The Ugly, Department of Biomedical Sciences, Humanitas University, Milan, Italy.
2023	Neutrophils During Myocardial Infarction: Friends or Foes? MizzouForward Keystone Address, University of Missouri, Columbia, MO
2022	Targeting Neutrophils During Myocardial Infarction: The Good, The Bad and The Ugly, Division of Cardiology, Dept of Medicine, Oklahoma University Health Sciences Center, Oklahoma City, OK
2022	Neutrophils During Myocardial Infarction: The Good, The Bad and The Ugly. The Precision in the Science of Medicine (PRISM) Seminar Series, University of Texas Health Sciences Center, SA.
